

Characteristic & Function

- LED light bars on both door panels
- 6 pinpoint horizontal zones to precisely identify location. (3 left and 3 right)
- Auto Set, Micro Controller Based
- High Performance Multi-zone Detection
- Operational Frequency can adjusted Manually or automatically
- Sensitivity setting of individual zone 0-400
- Security Level 0-200
- Frequency Level 0-50
- Automatically count passengers and alarm up to 9999
- Keypad for Program setting
- Detect all type of Metals
- Audio / Visual indications for metal detection.
- WALK-STOP indicators to regulate the flow of traffic
- Harmless to the human body (Heart Pacemaker, Pregnant Women, Magnetic Floppy, Recording Tape etc.

Technical Parameter

NABL Tested	Government Approved Lab
Dimensions	Approx 2160mm (h) x 820mm (w) X 350mm (d)±5%
Net weight	Around 30 kgs
Power	AC 100V~260V 50/60Hz
Humidity	95% Non condensing
Workplace Environment	- 20°C to 55°C
